Pioneer in School Software

COMPANY PROFILE

We are glad to introduce ourselves as pioneer in providing software solution for school domain from last 20 years. Our iSRMS software is successfully implemented in prestigious and renowned CBSE, State Board & ICSE Schools in India which proves the quality of our product and services.

As a cornerstone of our strategy, we collaborate with our customers to help them meet the challenges of the information age, to help them look beyond the hype and to get technology to work for their business models.

OUR BELIEF

We believe in utilizing technology to make things simple & easy to use. We also believe in thinking ahead and delivering products or services that can fit well with upcoming future technologies.

OUR SERVICES

Our professionals are fully trained to work closely with your school staff to gain and understand the functions of your school.
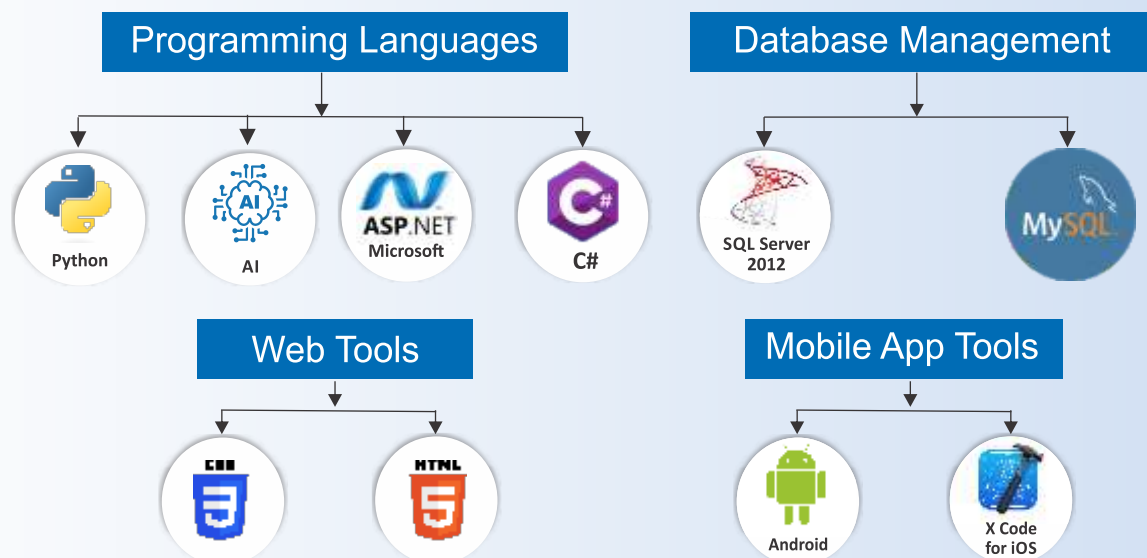

We have developed a comprehensive implementation strategy which ensures that your staff is fully trained to successfully implement the entire project.

We help our clients to improve their business performance by building and supporting innovative solution that help them to effectively & efficiently manage their entire organization.

OUR TECHNOLOGICAL EXPERTISE

As a premier software development company, Syon Technologies helps to deliver scalable, complex, future ready solution by utilizing its unique frameworks and experience of latest programming languages, databases, libraries, API's and Tools. We have a team of IT Professionals having more than 20 years of experience in software development and mobile app development.

How Are We DIFFERENT?

- Our software solution is a client server & web based integrated package with centralized database.
- The database is located at server in school so there is no chance of data hampering.
- We have a very extensive MIS reporting which empowers the management for taking decisions.
- Software works on different exceptional cases.
- Session wise data management.
- Very easy to understand and simple user interface.
- Three levels of security – Field level, Form and Module Wise.
- Self-developed printing tool.
- Auto locking of all important processes.
- Our after sale support is quite appraisable.

OUR PUBLICATION

In today's world computers are an integral part of our lives. Thus it is an absolute necessity to educate and train the 21st century learners to become proficient in the use of computers and empower them with the basics of the subject, at the same time open up room for them to explore and learn on their own.

WHY OUR COMPUTER BOOKS?

Our team has IT professionals having experience of more than 25 years in national and international corporate training.

We have an experienced computer HODs of renowned schools in our advisory panel. With their guidance and suggestions, we have included fundamental concepts and real life examples to explain the different topics.

The aim of our books is to create awareness among students about the latest technological development and at the same time provide them with the strong foundation of the concepts to apply knowledge in real life situations.

DIGITAL & 21ST CENTURY SKILLS

Coding Concepts
CODING is aim to develop students' logical thinking skills and problem solving skills.

AI Concepts
As demand for AI specialists increases, so does the need for students who can build, use and manage emerging AI technologies

Computational thinking
Computational skills are the foundation to engage in any computational problem solving and should be integrated into early learning classes.

Web Development
Developing the website using HTML-5 programming language and creating dynamic web pages using JavaScript.

Data Science
Data Scientists are high in demand and this surge is due to evolving technology and generation of huge amounts of data like Big Data.

Latest Technology
Office 2016, Windows-10, Photo editing, Animation Software and other IT related topics.
